

FRONT RUNNER 2X

UTA  

Improving Utah's Commuter Rail System

The FrontRunner 2X project adds capacity to the FrontRunner system so trains can run more often, faster, and more reliably, supporting Utah's population and economic growth along the Wasatch Front.

IMPROVEMENTS

26.1 Miles of Added Double Track	11 Double Track Sections	1 Realigned Section
10 New Trainsets	1 New Maintenance Facility	1 New Station

RIDER BENEFITS

15 MIN. Peak Service Current: 30 min.	30 MIN. All-Day Service Current: 60 min.
--	---

 FREQUENCY 2x current service, increases capacity and convenience	 RELIABILITY Increased double tracking means fewer delays
--	--

 MORE CHOICE FrontRunner travel times will be 17% faster than I-15, offering a convenient transit alternative*	 GROWTH Ridership is expected to increase by 53%*
---	--

*Based on 2050 estimates
